Team Project - CTiS: Team Project Portfolio Impact of Technology Site

Stella Lee & Hansung Jang

Team Proposal Slide

- The technology/topic our team has chosen to investigate is how society uses technology to connect with each other.

- Potential topic/issues we will discuss:

  1. How social media helps society interact through the internet

  2. How being more connected as led to more issues such as cyber bullying, security and safety.

  3. Virtual reality

  4. Online learning/working through the pandemic

- Brief explanation of topic, its relevance and why we chose it.
  - We are going to discuss how we use technology to connect with each other. Technology is constantly evolving and has heavily influenced the way our society connects with each other over the years, and how it is the reason why we have been more connected with one another than we ever have before. We chose it because we believe our generation
